25X1D

Two large revetments have been observed at Brest SA-2 SAM Site A-03 on KEYHOLE photography of [REDACTED] and [REDACTED]. One, 90 by 70 feet, is located 625 feet NE of the center of the site; the other, [REDACTED] is located 580 feet ENE of the center of the site. They are 130 feet apart center to center. Both revetments are rectangular, with the shorter sides toward the SAM site, and drive-through, being served by a road from the site circular road. Construction in the area of the revetments was observed on Mission [REDACTED].

The site appears to be fully equipped with launchers and guidance and support equipment. It has 3 missile-hold revetments, one of which appears to be under construction and another of which is either covered or contains a building [REDACTED].

25X1D

The site support area is approximately 1,600 feet WSW of the center of the site and contains one building [REDACTED], one building 70 by 30 feet, and 4 buildings 70 by 35 feet. A possible building or wall [REDACTED] is also in the area; a similar structure has been observed at Brest SA-2 SAM Site A-11.

25X1D

Two possible vehicle revetments, 55 by 25 feet, are approximately 1,100 feet west of the center of the site and are served by a road from the support area.
